

# Viburnum acerifolium

## Mapleleaf Viburnum

A low, slender-stemmed shrub which spreads to form large, loose colonies. Flowers are yellowish-white, in flat-topped clusters. Fruit is black, ripens in September, often persists into winter. Fall color is wonderful; it ranges from a pale, creamy pink, to bright red, to purple. Thrives in shade and in dryish soils. Occurs in the wild as an understory plant in upland forests.

***Suggested companions:*** oaks (*Quercus* sp.), sassafras (*Sassafras albidum*), serviceberry (*Amelanchier arborea*), Pennsylvania sedge (*Carex pensylvanica*), round-leaved hepatica (*Hepatica americana*), yellow trout lily (*Erythronium americanum*)
